Details are described the section General Specifications and Scope of Work.

The terms and conditions in this document shall become part of any contract resulting from this Request for Quotation. Your bid must be received at the location and by the date and time shown above. Bids shall be submitted on the form furnished and must include original signatures.

**THE PERIOD OF PERFORMANCE** for this work is from the date of award to October 31, 2023 unless otherwise agreed to with the City Project Manager. Throughout the period, the contractor is responsible for keeping and submitting monthly work logs and billing records to the City Treasurer.

## **General Specifications**

The City of Gustavus is planning to have a stockpile of pit run gravel established at the DRC for use when gravel is needed for emergency road and drainage work when winter conditions, flooding or concern that the condition of Wilson Road will be degraded by truck traffic prevents access to the gravel pits. This RFQ is for excavating, delivering and stacking up to 400 cubic yards of pit run gravel. The City intends to stockpile 400 cubic yards but may increase or decrease quantities from the anticipated 400 cubic yards depending on space utilization, cost, or other factors, with a minimum amount of 300 cubic yards guaranteed. Any variation will be in even 10 cubic yard truck loads.

The source of the material will be the City of Gustavus gravel pit. The available area for this gravel stockpile is around the existing rock stockpile, which is located at the beginning of the driveway to the septage holding tanks. Some of the ground at the stockpile has previously had six inch rock stockpiled on it and is prepared for new material. There is some additional space that is not prepared for stockpiling that can be used with the approval of the Project Manager.

## **Scope of Work**

Excavate, deliver and stack up to 400 cubic yards of pit run gravel hauled from the City of Gustavus gravel pit to the DRC. Stacking is necessary due to the limited area available for the stockpile.

If there is not sufficient stockpile area to place the entire 400 cubic yards of material, the contractor will be paid proportionately for the actual cubic yards delivered and stacked.

Photo 2: Available stockpile area to the west of the rock stockpile. Material can be stacked against the berm in the background.

The Contractor will perform the duties under this agreement as an independent contract. The City assumes no responsibility for any interpretation or representations made by any of its officers or agents unless such interpretations or representations are made by Addenda.

**METHOD OF AWARD**

When the award is given to other than the lowest bidder, a full and complete written statement of reasons will be delivered to the unsuccessful low bidder or bidders and filed with the other papers relating to the transaction.

The City Council may reject the bid of a bidder who is in arrears on taxes, permits, special assessments and/or any other monies that may be due the City or who failed to perform on a previous contract with the City.

**PURCHASE ORDER/CONTRACT**

It is the intent of the City to use a purchase order and the bidding documents to establish the contractual relationship between the City and the lowest responsive, responsible bidder. The following conditions shall apply:

After the bid is accepted and approved by the City Council, the bidder will be issued a “Notice of Award” letter.

A purchase order will be issued by the City following the Notice of Award. Once signed by both parties, the purchase order and RFQ combined will establish the contractual relationship between the City and the contractor.
