---

Good afternoon,

Would you please share this with the City Council. There is a very dangerous double headed tree aka a widow maker that is trying to fall across Rink Creek road just past the driveway to the Barry subdivision. This tree is in a blind corner and could seriously injure people if it comes down. The branches are almost low enough to hit a Box truck that was delivered this past week. I hope the city can do something about this tree soon. There are also other trees that need attention along Rink Creek. Thank you

Rebecca Swanson
