

**CITY OF GUSTAVUS, ALASKA  
RESOLUTION CY15-29**

**A RESOLUTION BY THE CITY OF GUSTAVUS APPROVING THE PROJECT  
SCOPING DOCUMENT FOR THE DICKEY DRIVE CULVERT REPLACEMENT**

**WHEREAS**, Dickey Drive, a City of Gustavus public road, crosses the Crane Flats creek using a culvert installed by a past developer many years ago and;

**WHEREAS**, the road embankment is eroding seriously at the culvert site, and;

**WHEREAS**, the road crossing is unguarded with a drop into the stream of approximately 10 feet, creating a serious traffic hazard, and;

**WHEREAS**, the badly perched culvert does not meet culvert design and installation standards and blocks fish passage, and;

**WHEREAS**, the site has been identified by the City of Gustavus and the US Fish and Wildlife Service, Juneau office as an opportunity to improve fish passage using funds available from the US FWS, and;

**WHEREAS**, US FWS has already funded a survey of the site and the design of a solution that will eliminate the traffic hazard, improve fish passage and reduce future road maintenance needs at the site, and;

**WHEREAS**, US FWS has confirmed funding in place for the construction of a timber bridge at the site with no additional funding from the City of Gustavus anticipated, and;

**WHEREAS**, the City of Gustavus will provide only in-kind project management and accounting support.

**NOW THEREFORE BE IT RESOLVED** that the Gustavus City Council approves the attached project scoping document for the Dickey Drive Culvert Replacement Project and authorizes the Mayor to proceed, develop, and advertise an Invitation to Bid (IFB) for the project. Council approval of the IFB will be required before posting it for bids.

**PASSED** and **APPROVED** by a duly constituted quorum of the Gustavus City Council this 9<sup>th</sup> day of November, 2015, and effective upon adoption.
